Thanks Kelly:

I appreciate the update, and do understand that things are still a work in progress with the neonics given how fast everything is moving. Also, that's great that you've already had a chance to update your deliverables to incorporate these changes.

I discussed your note with Amy and our plan will be to give these updates to the thiamethoxam registrants verbally on Wednesday. They will obviously need to know our full mitigation plan, but they likely have plenty to digest before Wednesday already.

One question: Christina, in addition to thiamethoxam, will HED be publishing an updated ORE memo for clothianidin? I don't think so, but wanted to check.

- Meg

Hi Meg,

My apologies for this last minute change to the thiamethoxam mitigation proposal, but we (HED) had some discussions yesterday and this morning related to seed treatment (stemming from thiabendazole actually) which impact thiamethoxam.

I've attached a track changes version of the mitigation plan and an updated draft ORE which captures all the changes since the response to comments. For now, I've left in the PF5 options, but I can take those out if you would prefer. Please let me know if you have any questions.

Thanks,
Kelly
